

Do you know which places Germany colonized?

Weißt du, welche Orte Deutschland kolonisiert hat?

We chose a map that shows the world in the way it is usually shown in order to make it easier to identify countries / territories. However, this representation of the world is euro-centric and we encourage you to look at this map from different, more critical views. Try to imagine another centeroid to the map, flip it around, rotate it to a certain angle, look at it downwards or from the side!
